## EXPERIENCE

### BACK-END DEVELOPER at Rakuten France.

2024.02-2024.08

Back-End developer in the C2C team, responsible for:

- ◊ Optimization of shipping operations via ShipEngine APIs.
- ◊ Refactoring of monolithic project functionalities into microservices.
- ◊ API development.
- ◊ Platform maintenance.

Technologies: SpringBoot, JEE, Maven, JUnit, Mockito, RabbitMQ, Git, Jenkins

### FULL-STACK DEVELOPER at INSA CVL.

2023.12-2024.01

Development of an e-commerce platform for books using Spring Boot and Thymeleaf, enabling multi-library orders and secure transaction management, with:

- ◊ Library validation before access.
- ◊ Secure transactions with authentication.
- ◊ Performance and user experience optimization.

Technologies: SpringBoot, Thymeleaf, Maven, MySQL, Bootstrap

### FULL-STACK DEVELOPER at SpotInLeads.

2023.05-2023.09

Development of the SPOT MANAGER application on Android/iOS, designed to centralize and simplify professional page management for businesses, including publications, messaging, and reviews across different social networks.

Technologies: SpringBoot, Maven, Hibernate, Flutter, Git, MySQL

### BACK-END DEVELOPER at Nava Business.

2022.03-2022.06

Development of a web application for fleet management, including a legal module and tracking interventions for all fleet vehicles.

Technologies: SpringBoot, Maven, Hibernate, MySQL

### FULL-STACK DEVELOPER at ENSAA.

2021.10-2022.02

Contributed to the design and development of a business management web application, covering expenses, sales, purchases, inventory, clients, employees, and salaries, within a team of five developers.

Technologies: JEE, Spring, Maven, Hibernate, MySQL, Bootstrap
