website : Driss's portfolio (driss-ben.github.io)

Double degree student between ENSA Agadir and INSA Centre Val de Loire, currently in the 5th year, specializing in security and information technologies. I am currently doing my final internship and seeking an opportunity in software development to showcase my passion and knowledge in this field.

PROFESSIONAL EXPERIENCES

02/2024 – Present | FSP Internship - RAKUTEN FRANCE - Paris

Participation in a professional environment with the C2C team for the migration of carrier providers from the platform to ShipEngine, aiming to make their management more dynamic. Also involved in migrating features from the monolithic project to microservices, all based on a hexagonal architecture. Worked on platform maintenance, integration testing, and migrating projects from BitBucket to GitHub.

Technologies: SpringBoot, Spring, JEE, Junit, DevOps

05/2023 – 09/2023 | FYP Internship - Spot In Leads - Bourges

Development of the SPOT MANAGER application on Android/iOS, aimed at streamlining and simplifying the management of professional pages for businesses, focusing on posts, messaging, and reviews across various social networks.

Technologies: Flutter, SpringBoot, MySQL

03/2022 - 06/2022 | FYP - NAVA BUSINESS - Agadir

Development of a web application for managing a vehicle fleet, including the legal module and interventions on all the vehicles in the fleet.

Technologies: SpringBoot, MySQL

07/2021 - 09/2021 | Summer Internship-RIBATIS-Casablanca

Development of an interactive website for the Moroccan Ministry of Urban Planning and Territorial Development, facilitating interaction between administrators and the public.

Technologies: PHP, HTML, CSS, MySQL, JavaScript

ACADEMIC PROJECTS

10/2021 – 02/2022 | ENSA AGADIR

Participation in a team of five students for specifying requirements, drafting the specifications, designing, and developing a web application for business management covering expenses, sales, purchase requests, inventory, clients, administrators, employees, and salaries.

Technologies: JEE, Hibernate, MySQL
