EDUCATION

INSA Centre Val de Loire	**2022–2024**
Engineering Degree in Cybersecurity	
ENSA Agadir	**2018–2022**
Engineering Degree in Software Engineering	

EXPERIENCE

BACK-END DEVELOPER at *Rakuten France.*   2024.02–2024.08

Back-End Developer within the C2C team, responsible for:

◇ Optimizing shipping operations via ShipEngine APIs.

◇ Refactoring monolithic project features into microservices.

◇ Developing APIs.

◇ Maintaining the platform.

Technologies: SpringBoot, JEE, Maven, Junit, Mockito, RabbitMQ, Git, Jenkins

FULL-STACK DEVELOPER at *INSA CVL.*   2023.12–2024.01

Developed a book e-commerce platform using Spring Boot and Thymeleaf, enabling multi-library orders and secure transaction management, with:

◇ Library validation before access.

◇ Secure transactions through authentication.

◇ Performance optimization and improved user experience.

Technologies: SpringBoot, Maven, Hibernate, MySQL, Thymeleaf, Bootstrap

FULL-STACK DEVELOPER at *SpotInLeads.*   2023.05–2023.09

Developed the SPOT MANAGER application for Android/iOS, designed to centralize and simplify the management of business pages, including posts, messaging, and reviews across various social networks.

Technologies: SpringBoot, Maven, Hibernate, Flutter, Git, MySQL

BACK-END DEVELOPER at *Nava Business.*   2022.03–2022.06

Developed a web application for fleet management, including a legal module and tracking interventions on all fleet vehicles.

Technologies: SpringBoot, Maven, Hibernate, MySQL

FULL-STACK DEVELOPER at *ENSAA.*   2021.10–2022.02

Contributed to the design and development of a web-based business management application, covering expenses, sales, purchases, inventory, clients, employees, and salaries, as part of a five-developer team.

Technologies: JEE, Maven, Hibernate, MySQL, Bootstrap

TECHNICAL SKILLS

Programming: Java, Dart, C/C++/C#, Python, PHP, JavaScript, TypeScript
Frameworks: SpringBoot, Spring, JEE, Flutter, React, .NET, Hibernate, JUnit
DevOps: AWS, Kubernetes, Jenkins, Git, GitHub, BitBucket, Docker, RabbitMQ
Tools: Maven, Postman, Swagger, Jira, MySQL, PostgreSQL, MongoDB, Redis
